

Table of Contents

Section 1 – Introduction and Purpose

1.1	Overview of the Watershed Planning Process	1-1
1.1.1	Background and Legal Basis for Planning.....	1-1
1.1.2	Involved Parties	1-5
1.2	Level 1 Assessment Details	1-6
1.2.1	Goals and Objectives	1-6
1.2.2	Assessment Document Structure	1-7
1.2.3	Limitations	1-7
1.3	Coordination with Parallel Planning Activities	1-8
1.3.1	Salmon Recovery Act	1-9
1.3.2	Subbasin Planning Efforts.....	1-9

Section 2 – Watershed Characteristics

2.1	Regional Setting.....	2-1
2.2	Delineation of Implementation Areas.....	2-1
2.2.1	Asotin Creek Implementation Area	2-4
2.2.2	Middle Snake River Implementation Area	2-4
2.2.3	Pataha Creek Implementation Area	2-5
2.2.4	Tucannon River Implementation Area.....	2-5
2.3	Geology and Hydrology.....	2-5
2.4	Climate.....	2-6
2.4.1	Climatological Data Sources.....	2-7
2.4.2	Analysis of Climatological Data.....	2-7
2.4.3	Summary of Climate Data	2-13
2.5	Land Use	2-16
2.6	Vegetation.....	2-19
2.7	Fish and Aquatic Habitat Resources.....	2-19
2.8	Population	2-19
2.9	Water Rights and Claims	2-23
2.9.1	Surface Water Rights	2-23
2.9.2	Ground Water Rights	2-33

Section 3 – Asotin Creek Implementation Area

3.1	Overview of the Asotin Creek Implementation Area	3-1
3.2	Surface Water Resources	3-2
3.2.1	Gauging Data and Stream Flows	3-2
3.2.2	Instream Flow Requirements	3-20
3.3	Water Demand Projections	3-20

3.3.1	Municipal and Rural Residential Demand	3-21
3.3.2	Agricultural Demand	3-24
3.4	Water Rights and Claims	3-28
3.5	Surface Water Quality.....	3-31
3.5.1	Water Quality Parameters	3-31
3.5.2	Surface water Quality Regulations	3-34
3.5.3	Surface Water Quality Criteria and 303(d) List.....	3-35
3.5.4	Existing Surface Water Quality Monitoring	3-35
3.5.5	Areas of Impacted Water Quality	3-42

Section 4 – Middle Snake River Implementation Area

4.1	Overview of the Middle Snake River Implementation Area	4-1
4.2	Surface Water Resources	4-2
4.2.1	Gauging Data and Stream Flows	4-2
4.2.2	Instream Flow Requirements	4-28
4.3	Water Demand Projections	4-29
4.3.1	Municipal and Rural Residential Demand.....	4-29
4.3.2	Agricultural Demand	4-32
4.4	Water Rights and Claims	4-33
4.5	Surface Water Quality.....	4-36
4.5.1	Surface Water Quality Criteria and 303(d) List.....	4-36
4.5.2	Existing Surface Water Quality Monitoring	4-43
4.5.3	Areas of Impacted Water Quality	4-46

Section 5 – Pataha Creek Implementation Area

5.1	Overview of the Pataha Creek Implementation Area	5-1
5.2	Surface Water Resources	5-1
5.2.1	Gauging Data and Stream Flows	5-2
5.2.2	Instream Flow Requirements	5-16
5.3	Water Demand Projections	5-17
5.3.1	Municipal and Rural Residential Water Demand	5-17
5.3.2	Agricultural Demand	5-19
5.4	Water Rights and Claims	5-21
5.5	Surface Water Quality.....	5-23
5.5.1	Surface Water Quality Criteria and 303(d) List.....	5-23
5.5.2	Existing Surface Water Quality Monitoring	5-27
5.5.3	Areas of Impacted Water Quality	5-28

Section 6 – Tucannon River Implementation Area

6.1	Overview of the Tucannon River Implementation Area.....	6-1
6.2	Surface Water Resources	6-1
6.2.1	Gauging Data and Stream Flows	6-2
6.2.2	Instream Flow Requirements	6-21

6.3	Water Demand Projections	6-22
6.3.1	Municipal and Rural Residential Demand	6-22
6.3.2	Agricultural Demand	6-25
6.4	Water Rights and Claims	6-26
6.5	Surface Water Quality.....	6-28
6.5.1	Surface Water Quality Criteria and 303 (d) List.....	6-28
6.5.2	Existing Surface Water Quality Monitoring.....	6-35
6.5.3	Areas of Impacted Water Quality	6-38

Section 7 – Ground Water Resources

7.1	Geology.....	7-1
7.1.1	Overburden and Overlying Sediments.....	7-4
7.1.2	Columbia River Basalt.....	7-4
7.2	Hydrogeology	7-13
7.2.1	Basalt Aquifers.....	7-13
7.2.2	Hydraulic Parameters of Basalt	7-13
7.2.3	Ground Water Movement	7-16
7.3	Hydraulic Continuity	7-20
7.3.1	Baseflow Assessment.....	7-21
7.3.2	Aquifer Recharge and Discharge	7-28
7.3.3	Ground Water Pumpage.....	7-29
7.3.4	Adequacy of Data to Characterize Hydraulic Continuity	7-31
7.4	Availability of Ground Water Resources in the Basin.....	7-32
7.5	Ground Water Quality.....	7-33
7.5.1	Ground Water Quality Programs and Regulations	7-34
7.5.2	Ground Water Quality Characteristics.....	7-36
7.5.3	Ground Water Contamination.....	7-37
7.5.4	Ground Water Quality Monitoring	7-38
7.6	Summary of Ground Water Resources	7-40

Section 8 – Water Balance

8.1	Introduction.....	8-1
8.2	Principle Water Balance Elements.....	8-1
8.2.1	Water Balance Equations.....	8-2
8.2.2	Precipitation	8-5
8.2.3	Evapotranspiration	8-5
8.2.4	Stream Flow, Baseflow, and Surface Water Runoff.....	8-7
8.2.5	Ground Water Recharge	8-8
8.2.6	Water Demand and Consumption Use.....	8-8
8.2.7	Ground Water Transfer and Storage	8-10
8.3	Simplifying Assumptions and Data Limitations.....	8-11
8.4	Summary of Water Balance Results	8-12
8.4.1	Basin-wide Water Balance Estimates	8-13
8.4.2	Hydrological System Water Balance for Tucannon-Pataha	8-14

Section 9 – Instream Flow

9.1 General Instream Flow Background 9-1
9.2 Setting Instream Flows 9-2
 9.2.1 Instream Flow Incremental Methodology 9-3
 9.2.2 Factors to Consider for Setting Instream Flows 9-3
9.3 Existing Instream Flow Studies 9-4
 9.3.1 Tucannon River IFIM – 1993 and 1995 9-4
 9.3.2 Tucannon River IFIM Study – 2004 9-5
 9.3.3 Asotin Creek IFIM Study 9-6
9.4 Instream Flow Administration Requirements 9-6
9.5 Surface Water Source Limitations 9-7

Section 10 – Recommendations

10.1 Introduction 10-1
10.2 Adequacy of Existing Data 10-1
 10.2.1 Climatological Data 10-2
 10.2.2 Planning Data 10-2
 10.2.3 Water Rights 10-3
 10.2.4 Surface Water Data 10-4
 10.2.5 Ground Water Data 10-5
 10.2.6 Water Balance 10-6
 10.2.7 Water Quality Data 10-7
 10.2.8 Habitat 10-9
10.3 Recommendations for Future Work 10-10

Appendices

Tables

1-1	Technical Assessment Requirements of the Watershed Management Act.....	1-4
1-2	Relationship of Existing Programs to Watershed Planning.....	1-10
2.4-1	Summary of Climate Data for WaWaWai Station.....	2-9
2.4-2	Summary of Climate Data for Dayton 1WSW Station.....	2-10
2.4-3	Summary of Climate Data for Pomeroy Station.....	2-11
2.4-4	Summary of Climate Data for Anatone Station.....	2-12
2.5.1	Summary of Land Cover in WRIA 35.....	2-17
2.5-2	Summary of Major Land Uses by Subbasin.....	2-17
2.5-3	Summary of Crop Type Acreage by County.....	2-18
2.5-4	Urban Land Uses and Land Use Changes in Lewis County and WRIA 26.....	2-19
2.8-1	Population Projection for WRIA 35.....	2-22
2.9-1	Summary of Surface Water Rights for WRIA 35.....	2-29
2.9-2	Surface Water Source Limitations.....	2-30
2.9-3	Summary of Ground Water Rights for WRIA 35.....	2-35
3.2-1	USGS Gauging Stations.....	3-5
3.2-2	Washington State Department of Ecology Monitoring Stations.....	3-5
3.2-3	WDFW Spot Data Locations.....	3-6
3.2-4	USGS Gauging Data.....	3-7
3.2-5	Surface Water Source Limitations.....	3-20
3.3-1	Population Projection for Asotin Subbasin.....	3-22
3.3-2	Average Rainfall and Per Capita Residential Demand.....	3-22
3.3-3	Average Day Demand Projection.....	3-23
3.3-4	Average Annual Volume Projection.....	3-23
3.3-5	Water Use by Crop.....	3-27
3.3-6	Irrigation Water Right Summary.....	3-27
3.4-1	Summary of Surface Water Rights.....	3-29
3.4-2	Summary of Ground Water Rights.....	3-30
3.5-1	Designated Uses and Water Quality Standards.....	3-37
3.5-2	303 (d) Listed and Impaired Stream Segments.....	3-39
3.5-3	Water Quality Monitoring Stations.....	3-42
3.5-4	Annual Summer Maximum Temperatures: North Fork Asotin Creek.....	3-44
3.5-5	Annual Summer Maximum Temperatures: South Fork Asotin Creek.....	3-44
3.5-6	Summary of Current Water Quality Conditions: Asotin Creek from George Creek to Snake River Confluence.....	3-47
3.5-7	Summary of Current Water Quality Conditions: Charley Creek.....	3-49
4.2-1	USGS Gauging Stations.....	4-6
4.2-2	United States Army Corp. of Engineers Reporting Stations.....	4-7
4.2-3	Washington State University Monitoring Stations.....	4-7

4.2-4	Washington Department of Ecology Monitoring Stations.....	4-8
4.2-5	Stream Flow Data	4-10
4.2-6	Surface Water Source Limitations	4-28
4.3-1	Population Projections	4-30
4.3-2	Average Rainfall and Per Capita Residential Demand	4-30
4.3-3	Average Day Demand Projections.....	4-31
4.3-4	Average Annual Volume Projections	4-31
4.3-5	Agricultural Water Use by Crop	4-32
4.3-6	Irrigation Water Right Summary	4-33
4.4-1	Summary of Surface Water Rights	4-34
4.4-2	Summary of Ground Water Rights	4-35
4.5-1	Water Quality Standards	4-38
4.5-2	303 (d) Listed Stream Segments	4-39
4.5-3	Historical Water Quality Monitoring Stations.....	4-43
4.5-4	WSU Water Quality Monitoring Stations.....	4-45
4.5-5	WFDW Water Quality Monitoring Stations	4-45
5.2-1	WSU Monitoring Stations.....	5-2
5.2-2	Washington Department of Ecology Monitoring Stations.....	5-3
5.2-3	Spot Stream Flow Data	5-5
5.2-4	Surface Water Source Limitations	5-16
5.3-1	Population Projections	5-17
5.3-2	Average Rainfall and Per Capita Residential Demand	5-18
5.3-3	Average Day Demand Projections.....	5-18
5.3-4	Average Annual Volume Projections	5-19
5.3-5	Agricultural Water Use by Crop	5-20
5.3-6	Irrigation Water Right Summary	5-20
5.4-1	Summary of Surface Water Rights	5-21
5.4-2	Summary of Ground Water Rights	5-22
5.5-1	Water Quality Standards for Waterbodies	5-25
5.5-2	303 (d) Listed and Impaired Stream Segments.....	5-26
5.5-3	Water Quality Monitoring Stations.....	5-27
5.5-4	Summary of Current Water Quality Conditions: Pataha Creek from Headwaters to Dry Pataha Creek Confluence.....	5-29
5.5-5	Annual Summer Maximum Temperatures: Pataha Creek from Headwaters to Dry Creek Confluence	5-30
5.5-6	Summary of Current Water Quality Conditions: Pataha Creek from Dry Pataha Creek Confluence to Sweeney Gulch Confluence.....	5-32
5.5-7	Summary of Current Water Quality Conditions: Pataha Creek from Sweeney Gulch Confluence to Tatman Gulch Confluence	5-34
5.5-8	Annual Summer Maximum Temperatures: Pataha Creek from Sweeney Gulch Confluence to Tatman Gulch Confluence	5-35
5.5-9	Summary of Current Water Quality Conditions: Pataha Creek from Tatman Creek to Mouth.....	5-36
6.2-1	USGS Gauging Stations.....	6-5

6.2-2	WSU Monitoring Stations.....	6-5
6.2-3	Washington Department of Ecology Monitoring Stations.....	6-6
6.2-4	Stream Flow Data	6-7
6.2-5	Historical Instream Flow Recommendations.....	6-21
6.2-6	Surface Water Source Limitations	6-22
6.3-1	Population Projections	6-23
6.3-2	Average Rainfall and Per Capita Residential Demand.....	6-23
6.3-3	Average Day Demand Projections.....	6-24
6.3-4	Average Annual Volume Projections	6-24
6.3-5	Agricultural Water Use by Crop.....	6-25
6.4-1	Summary of Surface Water Rights	6-27
6.4-2	Summary of Ground Water Rights	6-28
6.5-1	Water Quality Standards for Waterbodies	6-30
6.5-2	303 (d) Listed and Impaired Stream Segments.....	6-33
6.5-3	Historical Water Quality Monitoring Stations.....	6-36
6.5-4	WSU Water Quality Monitoring Stations.....	6-37
6.5-5	WDFW/CCD Water Quality Monitoring Stations.....	6-37
6.5-6	Summary of Current Water Conditions: Tucannon River from Headwaters to Panjab Confluence	6-39
6.5-7	Summary of Current Water Quality Conditions: Tucannon River from Pan Jab Creek Confluence to Little Tucannon River Confluence	6-41
6.5-8	Summary of Current Water Quality Conditions: Tucannon River from Little Tucannon River Confluence to Forest Service Boundary.....	6-43
6.5-9	Summary of Current Water Quality Conditions: Tucannon River from Forest Service Boundary to Cummings Creek Confluence	6-45
6.5-10	Summary of Current Water Quality Conditions: Tucannon River from Cummings Creek Confluence to Marengo	6-47
6.5-11	Summary of Current Water Quality Conditions: Tucannon River from Marengo to Willow Creek Confluence	6-49
6.5-12	Summary of Current Water Quality Conditions: Tucannon River from Willow Creek Confluence to Pataha Creek Confluence.....	6-51
6.5-13	Summary of Current Water Quality Conditions: Tucannon River from Pataha Creek Confluence to Kellogg Creek Confluence.....	6-53
6.5-14	Summary of Current Water Quality Conditions: Tucannon River from Kellogg Creek Confluence to Snake River Confluence	6-55
6.5-15	Annual Summer Maximum Temperatures: Sheep Creek	6-57
6.5-16	Annual Summer Maximum Temperatures: Panjab Creek	6-58
6.5-17	Annual Summer Maximum Temperatures: Meadow Creek.....	6-58
6.5-18	Annual Summer Maximum Temperatures: Little Tucannon Creek	6-59
6.5-19	Annual Summer Maximum Temperatures: Hixon Creek.....	6-59
6.5-20	Annual Summer Maximum Temperatures: Cummings Creek	6-60
7-1	Geological and Hydrogeological Framework.....	7-2
7-2	Model Calculated Water Level of Basaltic Aquifers.....	7-15
7-3	Lateral Hydraulic Conductivity of Basaltic Aquifers	7-15
7-4	Transmissivity of Basaltic Aquifers.....	7-15

7-5	Baseflow, Stream Flow and Surface Runoff: Asotin Creek Implementation area	7-23
7-6	Baseflow, Stream Flow and Surface Runoff: Middle Snake River Mainstem Implementation Area	7-24
7-7	Baseflow, Stream Flow and Surface Runoff: Tucannon River Implementation Area ..	7-24
7-8	Summary of Recharge Estimates for Implementation Area	7-29
7-9	Summary of Recharge Estimates for Implementation Area	7-29
7-10	Total Annual Ground Water Rights and Projected Total Demands For Pumpage Estimates.....	7-30
7-11	Implementation Area Characteristics Considered for Future Hydraulic Conductivity Assessment.....	7-31
7-12	Summary of Calculated Ground Water Recharge-Discharge for Drainage Basin in WRIA 35	7-33
7-13	Regional Programs for Protecting Ground Water Quality.....	7-35
7-14	Summary of Potential Ground Water Contamination Point Sources.....	7-38
8-1	Mean Annual Precipitation	8-5
8-2	Estimated Evapotranspiration	8-6
8-3	Summary of Stream Flow Calculations by Implementation Area for Basin-wide Water Balance.....	8-8
8-4	Net Water Demand by Implementation Area for Basin-wide Water Balance.....	8-9
8-5	Allocation of New Water Demand by Month for Ground Water System Water Balance	8-10
8-6	Summary of Basin-wide Water Balance by Implementation Area.....	8-14
8-7	Tucannon-Pataha Subbasin Hydrological System Water Balance Estimates.....	8-16
9.3-1	Summary of Optimum Flows Based on 1995 Tucannon River IFIM Study	9-5
9.3-2	Summary of Optimum Flows Based on 2004 Tucannon River IFIM Study	9-6
9.4-1	Summary of Flow Legal Requirements in Tucannon River	9-7
10-1	Summary of Recommendations for Future Work.....	10-11

Exhibits

2-1	Regional Map	2-2
2-2	Delineation of Implementation Areas	2-3
2-3	Elevation Changes within Basin	2-8
2-4	WaWaWai Climate Trends	2-14
2-5	Dayton 1 WSW Climate Trends	2-14
2-6	Pomeroy Climate Trends	2-15
2-7	Anatone Climate Trends	2-15
2-8	Land Cover/Land Use Map.....	2-26
2-9	Surface Water Rights by Section	2-26
2-10	Surface Water Rights by Subbasin	2-27
2-11	Ground Water Rights Summary by Section.....	2-34
3-1	USGS and Ecology Gauges/Monitoring Stations	3-4
3-2	Asotin Creek Below the Confluence: Complete Record of Average Monthly Values....	3-8
3-3	Asotin Creek just upstream of Headgate Dam: Complete Record of Average Monthly Values	3-9
3-4	Asotin Creek Below Kearney Gulch: Complete Record of Average Monthly Values.....	3-10
3-5	Asotin Creek at Asotin, WA: Complete Record of Average Monthly Values	3-11
3-6	Asotin Creek Below the Confluence: Mean Annual Volume.....	3-12
3-7	Asotin Creek just upstream of Headgate Dam: Mean Annual Volume.....	3-13
3-8	Asotin Creek Below Kearney Gulch: Mean Annual Volume.....	3-14
3-9	Asotin Creek at Asotin, WA: Mean Annual Volume	3-15
<i>*Please Note: All of the Exhibits for Water Quality are placed at the End of the Section.</i>		
4-1	Lower Snake Mainstem Subbasin Map	4-5
4-2	Snake River near Anatone, Washington Average Monthly Values: USGS	4-11
4-3	Snake River at Interstate Bridge Average Monthly Values: Ecology	4-12
4-4	Snake River near Clarkston Average Monthly Values: USGS.....	4-13
4-5	Snake River at Lower Granite Dam Average Monthly Values: USACE	4-14
4-6	Snake River at Little Goose Dam Average Monthly Values: USACE.....	4-15
4-7	Meadow Creek at Central Ferry Average Monthly Values: USGS	4-16
4-8	Snake River at Anatone, Washington Mean Annual Volume: USGS	4-17
4-9	Snake River at Interstate Bridge Mean Annual Volume: Ecology	4-18
4-10	Snake River near Clarkston Mean Annual Volume: USGS	4-19
4-11	Snake River at Lower Granite Dam Mean Annual Volume: USACE.....	4-20
4-12	Snake River at Little Goose Dam Mean Annual Volume: USACE	4-21
4-13	Meadow Creek at Central Ferry Mean Annual Volume: USACE.....	4-22
<i>*Please Note: All of the Exhibits for Water Quality are placed at the End of the Section.</i>		
5-1	Ecology and WSU Gauges/Monitoring Stations	5-4

5-2	Pataha Creek at Delaney: Complete Record WSU Monitoring Station Pataha 1.....	5-7
5-3	Pataha Creek at Marengo Rd. Bridge: Complete Record WSU Monitoring Station 3....	5-8
5-4	Pataha Creek at Demand Residence: Complete Record WSU Monitoring Stations 5	5-9
5-5	Pataha Creek at Delaney: Mean Annual Volume	5-10
5-6	Pataha Creek at Marengo Rd Bridge: Mean Annual Volume.....	5-11
5-7	Pataha Creek at Demand Residence: Mean Annual Volume.....	5-12
5-8	Pataha Creek at Archer Rd: Complete Record	5-13

**Please Note: All of the Exhibits for Water Quality are placed at the End of the Section.*

6-1	Tucannon Subbasin Map.....	6-4
6-2	Tucannon River at Headwaters Complete Record of Values: WSU	6-8
6-3	Tucannon River just Downstream of Cummings Creek Complete Record of Values	6-9
6-4	Tucannon River near Pomeroy, Washington Complete Record of Values: USGS	6-10
6-5	Tucannon River near Starbuck, Washington Complete Record of Values: USGS	6-11
6-6	Tucannon River at Powers, Washington Complete Record of Values: Ecology.....	6-12
6-7	Tucannon River at Headwaters Mean Annual Volume: WSU	6-13
6-8	Tucannon River just Downstream of Cumming Creek Mean Annual Volume: WSU..	6-14
6-9	Tucannon River near Pomeroy, Washington Mean Annual Volume: USGS	6-15
6-10	Tucannon River near Starbuck, Washington Mean Annual Volume: USGS	6-16
6-11	Tucannon River at Powers, Washington Man Annual Volume: Ecology	6-17

**Please Note: All of the Exhibits for Water Quality are placed at the End of the Section.*

7-1	Surfacial Geology	7-3
7-2a	Geological Cross Section A-A1	7-6
7-2b	Geological Cross Section A1-A2.....	7-7
7-2c	Geological Cross Section B-B1	7-8
7-2d	Geological Cross Section C-C1	7-9
7-3a	Geological Cross Section – Clarkston	7-10
7-3b	Geological Cross Section – Asotin	7-11
7-4	Generalized Diagram of Typical Basalt Flows.....	7-12
7-5	Potentiometric Contours – Model Simulation	7-18
7-6	Potentiometric Contours – Ecology Will Logs.....	7-19
7-7	Average Mean Stream Flow and Estimated Baseflow in Asotin Creek.....	7-25
7-8	Average Mean Stream Flow and Estimated Baseflow in Meadow Creek.....	7-26
7-9	Average Mean Stream Flow and Estimated Baseflow in Tucannon River	7-27

8-1	Illustration of Basic Water Balance Elements	8-3
8-2a	Monthly Climate Water Balance: Tucannon-Pataha Subbasins	8-17
8-2b	Monthly Surface Water Balance: Tucannon-Pataha Subbasins.....	8-18
8-2c	Monthly Ground Water Balance: Tucannon-Pataha Subbasins.....	8-19
